SKILLS

- **Languages:** JavaScript, C++, Java, Python, C
- **Frameworks/Libraries:** React, Node, Express, HTML, CSS, TensorFlow, Scikit-Learn, PyTorch
- **Tools/Platforms:** MySQL, MongoDB, Git, GitHub, Docker, AWS, Jupyter Notebook
- **Core Competencies:** Data Structures and Algorithms, DBMS, Operating System, ML, Backend Development
- **Soft Skills:** Problem Solving, Team Collaboration, Adaptability, Project Coordination

PROJECTS

Virtual AI Assistant | *MERN Stack (MongoDB, Express.js, React, Node.js)* | [GitHub Link](#) Mar' 26

- Built a full-stack MERN app with a responsive chat interface for seamless, real-time interaction with a personalized virtual assistant across devices.
- Implemented secure authentication and authorization using JWT with RESTful APIs in Express.js, ensuring protected routes, session handling, and reliable backend security mechanisms.
- Designed dynamic React components with Context API to manage global state, user profiles, and conversation history, improving scalability and efficient data flow across the application.

Tech Stack: MongoDB, Express.js, React.js, Node.js, REST API, JWT, Mongoose, Cloudinary, JavaScript, HTML, CSS

Food Delivery Time Predictor | *Python, Machine Learning* | [GitHub Link](#) Jul' 25

- Developed a predictive model to estimate delivery time using traffic, weather, and location-based features, helping improve delivery planning and operational efficiency.
- Performed data preprocessing and feature engineering to enhance model performance, including handling missing values, encoding variables, and selecting relevant features.
- Applied ensemble algorithms including Random Forest and XGBoost, achieving 82% accuracy with improved generalization and reduced prediction error.

Tech Stack: Python, Scikit-learn, Pandas, Random Forest, XGBoost, Feature Engineering, Model Evaluation

Customer Churn Prediction | *Python, Machine Learning* | [GitHub Link](#) Jul' 25

- Made a classification model using historical behavioral data to identify likely customer churn and enable proactive retention strategies.
- Conducted exploratory data analysis to identify key factors influencing customer retention, uncovering trends and patterns that impact churn behavior.
- Used supervised learning algorithms and achieved 91% prediction accuracy, optimizing model performance through tuning and validation techniques.

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Classification Algorithms, Data Analysis, Model Evaluation

CERTIFICATES

- ChatGpt-4 Prompt Engineering: ChatGpt, Generative AI & LLM | [Infosys](#) Sep' 25
- Complete Data Science, Machine Learning, Deep Learning, NLP | [Udemy](#) Sep' 25
- Computational Theory, Language Principles and Finite Automata | [Infosys](#) Aug' 25
- DSA in C++ | [Splen Technologies](#) Jul' 25
- Cloud Computing | [NPTEL](#) Apr' 25

ACHIEVEMENTS

- Solved more than **300** algorithmic problems on LeetCode and GeeksforGeeks.
- Strengthened AI and automation skills by completing a hands-on workshop on Agentic AI and ML.

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology – Computer Science and Engineering **CGPA: 7.6** Aug' 23 – Present

Zealot Public School Budaun, Uttar Pradesh
Intermediate – **84.6%** Apr' 20 – Mar' 22

Zealot Public School Budaun, Uttar Pradesh
Matriculation – **91.4%** Apr' 18 – Mar' 20
